

How to use ELECOM product image database

Welcome to ELECOM product image database.

You can search product pictures you need in three effective ways: catalogue, product code and leaflet .

The screenshot shows the '画像データベースシステム' (Image Database System) interface. It features a search section titled '型番・JANコードから探す' (Search by Model Number/JAN Code) with input fields for '型番' (Model Number) and 'JAN' (JAN Code), and a '検索' (Search) button. Callouts point to these fields, stating: 'When you search from "Product code" or "JAN code", enter "Product code" or "JAN code" and click button for searching.' Below the search section, there are three main navigation options: '総合カタログINDEX34から探す' (Search from General Catalogue INDEX 34), '新商品NEWSから探す' (Search from New Products NEWS), and 'ロジテック製品から探す' (Search from Logitech Products). Callouts point to these options, stating: 'When you search from catalogue, click here.' and 'When you search from leaflet of "New products info", click here.'

- When you search from [catalogue](#) or ["Product code"](#), see the page 2.
- When you search from [leaflet of "New product info"](#), see the page 4.

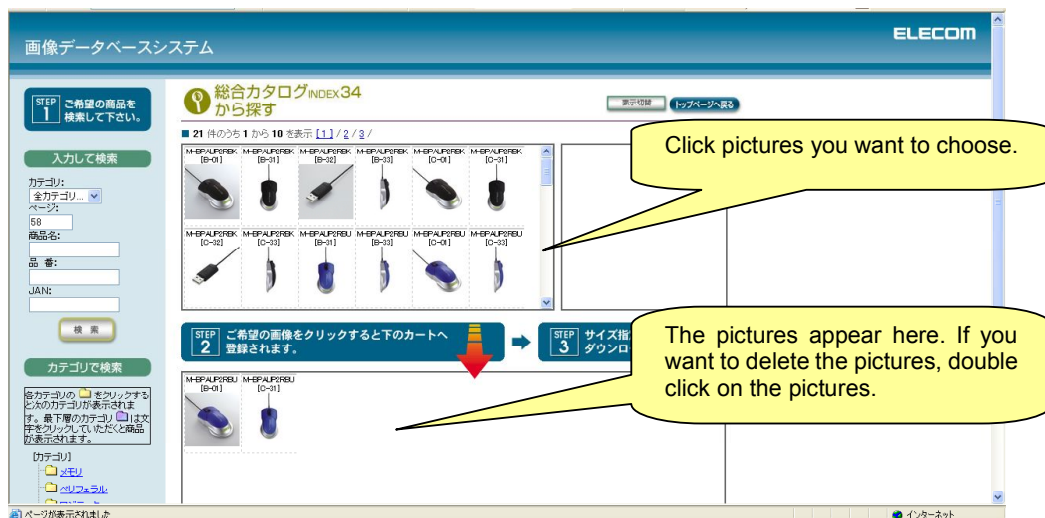

How to use ELECOM product image database

1. When you search from catalogue or "Product code".

1-1. Input page number to second column on the left side(You can also search from Product code or JAN code). See the example below. Input page number "58" in the second column and click "search" button, then you can find the pictures, which are used in page 58, on the right side of the screen.

1-2. Click the pictures you want to choose. The pictures appear in the lower basket (column). See the example below. Click blue mice pictures. If you want to delete pictures you've selected, simply double click on the pictures.

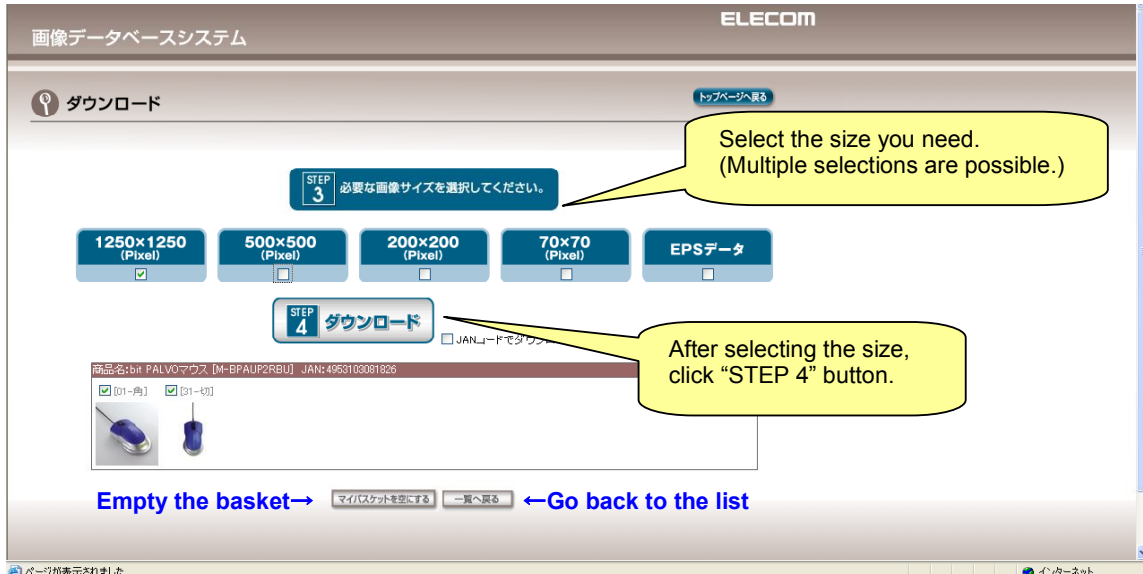

1-3. Click "GO" button.

How to use ELECOM product image database
