Reading from and writing to a memory card using a PC
## 1 Activate the PC

1 The power of PC is turned on.

✎ If the PC is started with this product connected, the product may not be recognized. If this problem occurs, remove and reconnect the product.

## 2 Connect to the PC

1 Pull out the USB connector from the product.

USB connector

2 Connect the USB connecter to the PC USB port.
The product will be automatically recognised by the PC.

* Confirm the proper up/down orientation of the connector when you connect it.

USB connector
3 The card reader is automatically recognised and the connection procedure is complete.

✎ When using Windows®, an "installation complete" notification will appear in the taskbar.

Your device is ready to use
Device driver software installed successfully.
3 Insert a memory card

1 Insert a memory card in the appropriate slot with the correct orientation and alignment.
Refer to "How to insert memory cards into the corresponding card slots" (on the front side) for details.

[Windows®] 2 The inserted memory card can be accessed.

[Macintosh] 2 A drive icon appears on the desktop and you can access the memory card.

✎ If an Auto Play dialog box appears, select the action that you want Windows to perform.

AutoPlay
Removable Disk (M:)
Always do this for pictures:
Pictures options
Import pictures and videos
General options
Open folder to view files
View more AutoPlay options in Control Panel
* If the card is empty, it is opened directly as a removable disk.

✎ Only insert one media card at a time.
Media may not be recognised if multiple cards are inserted at the same time.

4 Remove the memory card

Do not remove a memory card while the PC is writing to or reading from it.

[Windows®] 1 Open "My Computer" ("Computer" in Windows 7 and Windows Vista).

2 Right-click the removable disk that the memory card was assigned to, and on the context menu that appears, click [Eject].

3 Remove the memory card from the slot.

[Macintosh] 1 Drag the drive icon to the Trash (Eject).

✎ The Trash icon ( ) becomes an Eject ( ) icon.

2 Check that the drive icon has disappeared and remove the memory card from the slot.

5 Disconnect the card reader from the PC

Do not disconnect the card reader while the PC is writing to or reading from it.

[Windows®] 1 Click the 🔌, 📷, 💾, or 🔌 icon in the Taskbar or the Notification Area.

* If the icon is displayed in the Notification Area in Windows® 7, click it and then click the USB icon ( ) that appears.

* If removing a memory card using Windows® 7, proceed to step **4**.

2 Click the message that appears.

3 The "Safe to Remove Hardware" notification is displayed.

Safe To Remove Hardware
The 'Removable Disk (M:)' device can now be safely removed from the computer.

- Windows® 7, Windows® XP
  Proceed to Step **4**
- Windows Vista® 7, Windows® 2000
  Click OK, and proceed to Step **4**

Safe To Remove Hardware
This device can now be safely removed from the computer.
OK

✎ • If using a USB device or PC card besides this product, both names will be displayed.
In this case, click the message that appears for this product (indicating a USB mass storage device or USB disc).
• If a memory card is inserted into the memory card slot when using Windows® 7, click "Remove Mass Storage Device".

[Macintosh] ✎ Remove all memory cards from the card reader slots.

4 Disconnect the card reader from the USB port.

✎ Always disconnect the card reader from the PC before turning off the PC.

When using this product with Windows® 2000

Windows® 2000 Service Pack 4 or above is required to use this product. Perform the following steps to confirm your version. If using Service Pack 3 or earlier, use Windows Update to update it to the latest version of Windows® 2000. For information on performing the update, refer to your PC manual or consult the manufacturer of your PC.

1. Right-click the My Computer icon on your desktop, and then click "Properties" from the menu.
   The system properties window is displayed.
2. Confirm your version of Windows® 2000.

### If the Windows® installed on your computer does not support USB 2.0

When performing step 2 of "2. Connect to the PC", the following taskbar message or system notification will appear when you connect the USB connector to the PC USB port.

- When using Windows® XP Service Pack 1 or earlier
  "HI-SPEED USB Device Plugged into non-HI-SPEED USB Hub"
- When using Windows Vista® or Windows® XP Service Pack 2 or above
  "This Device Can Perform Faster"

This message is to inform you that even though this product is a USB 2.0-compatible device, the port that it is connected to does not support USB 2.0. In this case, this product will operate at USB 1.1 speed, not that of USB 2.0.

About Windows® drive letters

In Windows®, a single drive letter will be assigned to the 4 memory card slots (the letter shown in parenthesis is an example that assumes that the last assigned drive letter is E).
✎ More than 1 memory card slot cannot be used at the same time.

✎ In Windows® 7, the drive icon will appear once a memory card is inserted into a slot.

About Macintosh® drive icons

When using a Macintosh®, a different drive icon will appear depending on which memory slot you insert a card into.

Slot	❶, ❷ or ❸	❹
Drive icon	NO NAME	Untitled

If the PC does not recognise the card reader

If the PC does not recognise the card reader, disconnect it from the PC and try connecting it again.

✎ In Windows® 7, even if this product is recognised, the drive will not be displayed until a memory card has been inserted.
