1 Before Using the Product

This product must be charged before use. Use the included USB cable to charge.

1. The light turns off when charging is completed. If the LED lamp does not turn off after 2 hours, immediately disconnect the charging cable and stop charging. Continuing to charge for more than 2 hours can shorten the battery life and may lead to device failure.

2. Red light turns on while charging. This product must be charged before use.

3. [Charging connection] turns off.

Earphone to device failure.

It takes about two hours before charging is completed. If the LED lamp does not turn off after 2 hours, immediately unplug the charging connector.

Charging orientation with connecting. Be careful of the connector. USB charging cable connector Series A chargers can also be used for charging. Other USB-AC adapters and USB cigarette chargers will not output charging power. USB AC adapter USB cigarette charger

4. To USB terminal

To PC USB port

To AC wall outlet

2 Setting the Headset (Pairing Mode)

1. Enter the headset into pairing mode

With the power of this product turned OFF, press and hold the multi-function button for 8 seconds or more. When the LED lamp begins to blink red and blue, the device has entered pairing mode.

- If the device does not have pairing information, the device enters pairing mode when the power is turned on (3 seconds of holding down the multi-function button).

- If you press the multi-function button for 8 seconds or more after charging, the device will enter pairing mode if there is no pairing information. The device enters pairing mode when the power is turned on (3 seconds of holding down the multi-function button).

- If the device has already paired with another device, you can turn off the multi-function button to exit the pairing mode.

2. Searching for the headset from the connecting device

Search for this product from your mobile phone (smartphone) you want to pair with. How to search varies depending on the device used. For operations on the connecting device, refer to the user’s manual provided for your mobile phone (smartphone).

3. Registration the headset (pairing completed)

When the power is turned on (4 seconds of holding down the multi-function button), the headset enters pairing mode.

- If the headset does not have pairing information, the device enters pairing mode and a “Connecting” message is displayed on the device.

- Some devices may require prior operation to allow communication with LBT-HS350.

- Depending on the device (Bluetooth 2.1 or later), the device enters pairing mode when the Bluetooth headset is turned on.

4. For Subsequent Connections

1. Turn on the product to activate the power

While the product is turned off, press and hold the multi-function button for 4 seconds or more. The LED lamp blinks blue slowly (approx. once every 5 seconds).

2. Turn power OFF

Press and hold the multi-function button for 4 seconds or more. The LED lamp blinks red and then turns off, and the product turns OFF.

3. About the auto power-off function

If there is no signal from a connected device or no activity within 30 minutes while the product is turned on, the product will automatically turn OFF.
Handling precautions

Other: Please also pay attention to the following items.

- Avoid using or storing this product in locations exposed to vibrations or impact, in high temperature or humid areas, or in areas that are exposed to direct sunlight for long periods of time.
- This product is a precision device. Do not drop it or expose it to a strong impact.
- Do not place this product in locations with high temperatures and high humidity (vehicle dashboards, near heaters, etc.), in locations exposed to direct sunlight for long periods of time, in locations where static electricity easily occurs, or in locations with large amounts of dust.
- When this product becomes dirty, wipe it with a soft cloth that contains a small amount of water or mild detergent. Using benzene or thinner will cause deformation or discoloration.

Precautions regarding radio waves

The band of frequencies used by this device are used to operate local wireless base stations (wireless stations that require a licence) and designated low-power wireless stations (wireless stations that do not require a licence) for the detection of moving objects on factory production lines in addition to microwave ovens and other industrial/scientific/medical devices.

Before using this device, make sure that local wireless base station and designated low-power wireless stations for the detection of moving objects are not being operated.

- If this device has created radio wave interference for a local wireless base station for moving object detection, quickly change the frequency that is used or stop radio wave emission and then contact our technical support department for information on how to avoid interference (such as installing a partition).
- In other situations where some sort of problem has occurred such as when this device causes an incident where radio wave interference is produced for a designated low-power wireless station for moving object detection, contact the retailer from which you purchased the product.

About the internal battery

The battery is a consumable item that deteriorates even under normal usage. This is a feature of the battery. It is not faulty. The internal battery is a fee-based repair, even within the warranty period.

- If the product is stored for a long period of time without being used, the battery’s performance will decrease. The performance will be restored after the battery is charged and discharged a number of times.
- The operation time decreases in environments with a low ambient temperature.
- The lithium polymer battery is a recyclable resource.

Limitation of Liability

- ELECOM Co., Ltd. shall be held in no way liable for any compensation for special damages, consequential damages, indirect damages, punitive damages, or lost profit arising out of the use of this product.
- ELECOM Co., Ltd. makes no guarantees concerning the loss of data, errors, or any other problems that may occur on devices connected to this product.

Disposal of Old Electrical & Electronic Equipment

When you no longer need to use this product and the battery, be sure to dispose of it in accordance with the local ordinances and laws of your area.
