

HCE-DL01 series
Stock solution (500ml) + attached portable spray bottle
Eclear zero
HCE-DL02 series
Small volume 100ml spray that can be used as is with no dilution
Eclear zero light

Instruction manual

Hypochlorite acid water has excellent sterilizing and deodorizing effects, and can remove allergens (pollen, mites, and house dust). Easy on skin and clothing due to weak acidity and no residual effect. Please be sure to read this manual thoroughly before use, and be sure to use this product properly.

Safety precautions (be sure to always follow these precautions)

Usage precautions

- This product is not for drinking. Please do not inhale or ingest this product.
- Please do not mix this product with other detergents and chemicals.
- Please use tap water when diluting.
- If diluted with water to place in the portable bottle, make sure to use it within 1 month.
- If using with a humidifier, please add the stock solution after first adding water.
- If using with a humidifier, please use after thoroughly reading the instruction manual of the humidifier.
- For caution's sake, when using this for clothing, rugs, and furniture, please check for the presence of discoloration, etc. in inconspicuous places.
- Do not use this product directly on the human body.
- To maintain quality, please do not keep this solution inside other containers.

Storage precautions

- Please keep out of reach of children.
- Please avoid direct sunlight and be sure to close the lid and keep upright in order to prevent it from falling down or spilling.
- Please store in a cool and dark place and use as quickly as possible after opening the seal.

How to use Eclear zero

Please dilute the stock solution with tap water and use with each spraying tool such as a humidifier, spray bottle, etc. Depending on the intended use, the dilution ratio can be adjusted.

How to use with a portable spray bottle

(1) Remove the spray head of the attached spray bottle.

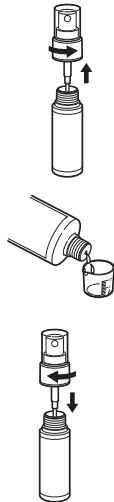

(2) Using the attached measuring cup, add about 7ml of this solution into a spray bottle and dilute it.

(3) Using the measuring cup, add about 23 ml of water into the spray bottle and dilute it.

(4) Attach the spray head firmly to the spray bottle.

(5) Please spray on the area you wish to sterilize and the area where odor is a concern.

- Please add it in the attached spray bottle.
- Please use tap water when diluting.
- Please use the diluted water for the portable spray bottle within 1 month.
- If it is difficult to notice any effects, please add this solution little by little.

First aid

- If this product has got into the eyes, immediately rinse with running water without rubbing.
- If this product is accidentally ingested, please take measures such as drinking water
- If abnormalities remain unresolved, please consult with your doctor.
Note: Please bring this product at the time of consultation with your doctor.

Others

- This product is not a pharmaceutical product.
- This product does not remove all viruses and bacteria.
- The effect may vary depending on the operating environment.

How to use with a humidifier

Stock solution: please be sure to dilute the water at a 1:9 ratio and use.

Example: When the tank capacity of the humidifier is 80ml, please first add 72ml of water and then add 8ml of this solution.

- This product can be used for ultrasonic humidifiers and evaporative humidifiers. Cannot be used for thermal humidifiers.
- If using with a humidifier, please add the stock solution after first adding water.
- In order to not exceed the tank capacity, please reduce the amount of water and stock solution to be added.
- Do not use this product with stock solution. Please be sure to dilute with water and use.
- Please be sure to use the attached measuring cup when diluting with water.

How to dilute Eclear zero

Dilution method 1 [stock solution: water = 1:3]

- How to make 30ml - stock solution 7ml + tap water 23ml
- This is the optimal concentration for sterilizing, deodorization, etc. in places requiring hygiene control such as facilities and shops.

Dilution method 2 [stock solution: water = 1:9]

- How to make 80ml - stock solution 8ml + tap water 72ml
- How to make 200ml - stock solution 20ml + tap water 180ml
- This is the optimal concentration for spacial sterilization, deodorization, etc. in general households.

Completion capacity	Amount of this solution to use	Measuring cup guide	Stock solution: water
Used in a portable spray bottle	About 7ml		1:3
Humidifier 80ml Used in a tank If it is HCE-HU01/02/03	About 8ml		1:9
Humidifier 200ml Used in a tank If it is HCE-HU 11	About 20ml		1:9

How to use Eclear zero light
