ENGLISH Manual Wired Mouse

Name and function of each part

1 Left button Left click on your PC.

2 Right button Right click on your PC.

Rotate forward and backward or click as a button to operate your PC

Specifications

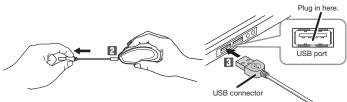

4 USB connector (male) Connect the USB connector to the USB port on a PC. When removing this product

from your PC This product supports hot plugging. The USB connector may be removed while the PC is in operation.

5 Ontical sensor Detects the mouse movements when you move the mouse.

6 Connector cable storage Store the connector cable

How to use the mouse

1 Start the PC.

Start the PC, and then wait for it to be ready to perform operations

2 Pull out the connector cable as far out as you would like. Plug the connector cable into the USB port on your PC.

Any USB port may be used.

- · Do not pull or bend the cable using excessive force. A fire or electric shock may result from broken wires.
 - Be sure to sufficiently check the connector orientation and the insertion location.
 - If you feel a strong resistance when inserting the USB connector, check that the shape and orientation of the connector is correct. Using excessive force may damage the connector
 - and cause injury.

 Do not directly touch the terminal area of the USB connector.

English (EN)

3 The driver will be automatically installed, and you will then be able to use the mouse.

■ To retract the cable

1 Hold the USB connector in one hand and the mouse in the other. Pull slightly (around 2/5 inch or 1 cm), then loosen.

• It is dangerous to let go of the USB connector as the cable retracts quickly. Please hold both the USB connector and the

mouse when you retract the cable

2 Keep the USB connector in the connector cable storage.
