

# To affix the glass screen protector with guiding frame

- Before attaching ● Place the screen protector on the LCD screen and make sure that it is aligned.
- Precautions ● If dirt and oil remain on your LCD screen, you may not be able to successfully put on the film. ● If dust remains on the LCD screen, it will cause the LCD screen to be scratched. ● When putting on the film, ensure that you do not touch the side of the screen protector that will be attached to your screen, and avoid leaving fingerprints and dust. ● Do not press the LCD screen strongly to remove air bubbles. This may damage or cause your device to fail. ● The images are for illustration purposes only.

<p>1</p>  <p>Cleaning cloth</p> <p>Turn off your device and wipe off the dirt on the screen with the included cleaning cloth.</p>	<p>2</p>  <p>Dust removal sticker</p> <p>Please remove the dust on the screen cleanly using the attached dust remover sticker.</p>	<p>3</p>  <p>Guiding frame</p> <p>Attach the guide frame to the device body according to the orientation of the words on the guide frame.</p>	<p>4</p>  <p>Screen side Removal label</p> <p>Product protection sheet</p> <p>Remove the protective sheet on the screen protector and attached it to the screen. This side will be attached to the screen after the protective sheet is removed.</p>	<p>5</p>  <p>Check the position of the camera on the device and apply the film in alignment with the guide frame.</p> <p>* Bending the film when applying it may lead to breakage.</p>	<p>6</p>  <p>Affix the center as shown in the figure and put on the film in such a way that the bubbles are forced out from the center to the edge. Remove the guide frame after applying the film and before use.</p>

<p><b>How to remove air bubbles</b></p> <p>If air bubbles remain after attaching the screen protector, use the spatula or your finger to lightly press the bubbles to the edge of the protector to remove it. Small air bubbles will become smaller and less noticeable over time.</p> <p>* Do not use your fingernails to remove the air bubbles. Doing so may scratch the film. * Applying excessive pressure may cause damage to the screen. * Depending on the size of the air bubbles, some may not disappear.</p>  <p>Air bubbles</p>	<p><b>To remove the affixed screen protector</b></p> <p>To remove the screen protector, slide the protection sheet between the screen protector and the device. <b>Slowly</b> lift the screen protector off so that does not bend too much.</p> <p>* Bending the screen protector too much when removing it may lead to breakage. * The screen protector may break if forcibly removed with your finger. Please use the protective sheet to remove it.</p>  <p>Screen protector</p> <p>Product protection sheet</p>
