Handling and servicing the product

■ Handling Gel Pads

- Do not touch the surface of the attachable side of the gel pads.
- Do not bend the gel pads.
- When not in use, paste the gel pads on the two sides of the storage sheet.
- Do not use a damp gel pad.
Before use, completely drain the water and let the adhesive surface dry
naturally.
- The gel pads must be stored in a suitable place and protected from direct
sunlight and high humidity.

■ Maintenance of the Gel Pads (standard of reference: maintain once after every 30 times of use)

Before maintenance, remove the gel pad from the main unit.

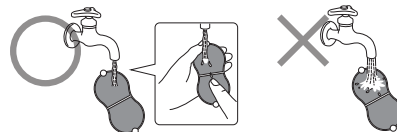

Clean the gel pad in any of the following cases:

- The gel pad cannot be securely fixed
- Weak stimulation during use
- Tingling in skin during use
- Dirty gel pad
- The gel pad cannot be fixed to the storage sheet

If the stimulation is still weak or your skin tingles after maintenance, replace the gel
pad.

- 1 **Run a small amount of water on the surface and rub it gently with
your fingertips for several seconds.**

※ Do not pour on too much water. Otherwise, the viscosity would reduce
and the contact surface to be bonded would be damaged.

- 2 **Hold it by the grip and shake it sufficiently to remove
excess water and let it air dry.**

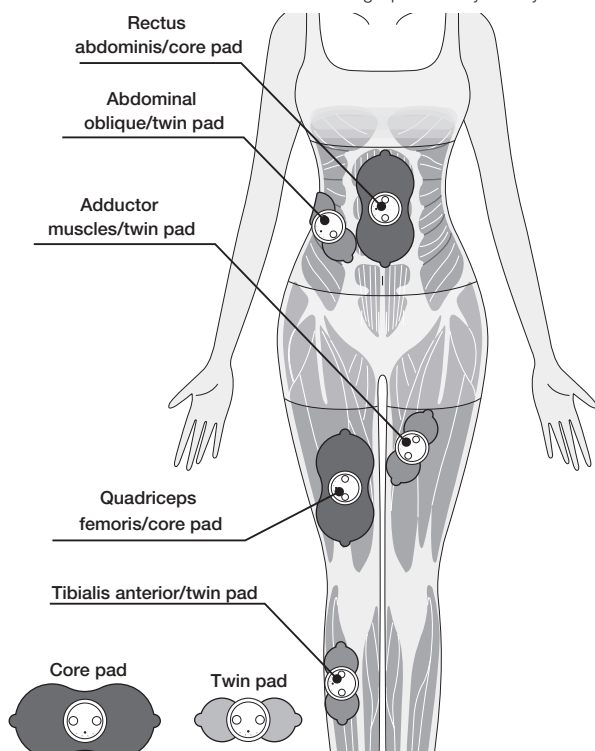

※ If not dried thoroughly, adhesion decreases.
※ Do not wipe the adhesive surface with a tissue or cloth.
※ Avoid direct sunlight.

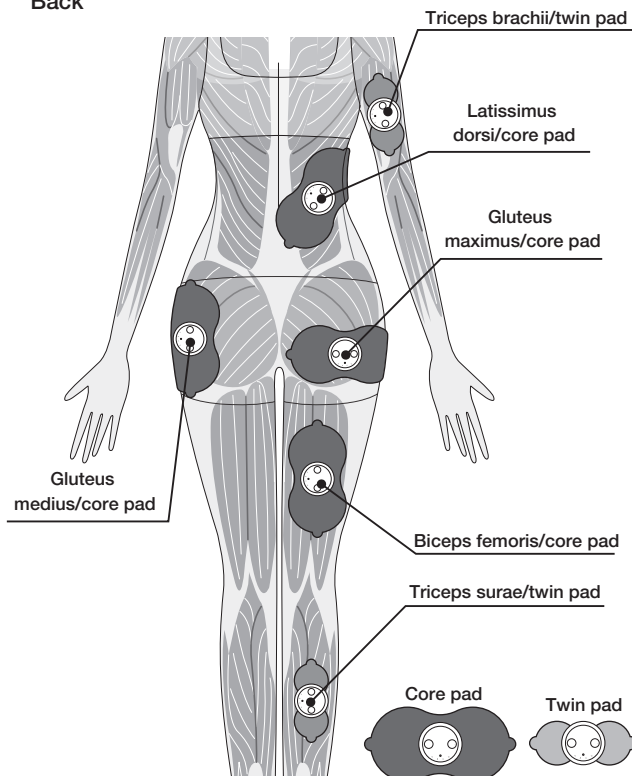

Example of gel pad attachment

Front

※ Attach the gel pad directly on to your skin.
