

## 2.0 megapixels Web camera UCAM-C525FB series User Manual

### Before using

Please read through the following contents before using.

### Safety Precautions

---

- Please connect this to a USB-A port supplying 5V, 500mA power.
- This product's stand may not be able to fit on your laptop or display screen.
- If you are unable to fit the stand on, please place it on a flat surface.
- Please ensure that this product is placed such that the cable is not pulled taut when using. If the cable is pulled taut, this product may fall off when the cable is caught and pulled. This may cause damage to the product and surrounding devices.
- When changing the direction of the camera, please ensure that you hold down the stand portion while moving it. Moving it forcibly may cause the product to fall from where it is placed. This may cause damage to the product and surrounding devices.
- Please do not place the camera on an uneven or slanted place. This product may fall off the unstable surface. This may cause damage to the product and surrounding devices.
- Please do not attach the camera to soft items or structurally weak parts. This product may fall off the unstable surface. This may cause damage to the product and surrounding devices.

### Precautions

---

- Please do not touch the lens using your fingers. If there is dust on the lens, use a lens blower to remove it.
  - Video calls above VGA size may not be possible depending on the chat software you use.
  - Depending on the internet environment you are using, you may not be able to use every software.
  - Sound quality and video processing may not perform well depending on your hardware's processing capabilities.
  - Due to the nature of this product and depending on your computer, your computer may stop recognizing this product when it enters standby, hibernation or sleep mode. When in use, cancel settings for standby, hibernation or sleep mode.
  - If the PC does not recognize this product, disconnect it from the PC and try connecting it again.
  - When using the camera, please do not set the computer to battery-saving mode. When switching your computer to battery-saving mode, please end the application that the camera is using first.
  - This product is made for Japanese domestic use. Warranty and support services are not available for use of this product outside of Japan.
- \* This product uses USB2.0. It does not support USB1.1 interface.

### Cleaning the Product

---

If the product body becomes dirty, wipe it with a soft, dry cloth.

Use of a volatile liquid (such as paint thinner, benzene or alcohol) may affect the material quality and color of the product.

# Name and function of each part

# How to use the camera

## Step 1

### Attach the camera

Attach the camera and adjust the vertical angle.

\* Recommend attaching above the display.

When attaching to the display of a laptop

When placing it on a flat surface or the table

## Step 2

### Connecting the camera

#### 1 Insert the USB connector of the camera into the USB-A port of the PC.

- You can insert or remove the USB even when the PC is switched on.
- Please ensure that the USB connector is the right side up and connect it correctly.

#### 2 The driver will be installed automatically.

This product can now be used.

To make video calls, please set up the camera and audio for the software you are using.

[Use with other chat software](#)

# Use with other chat software

Please use the chat software camera settings.

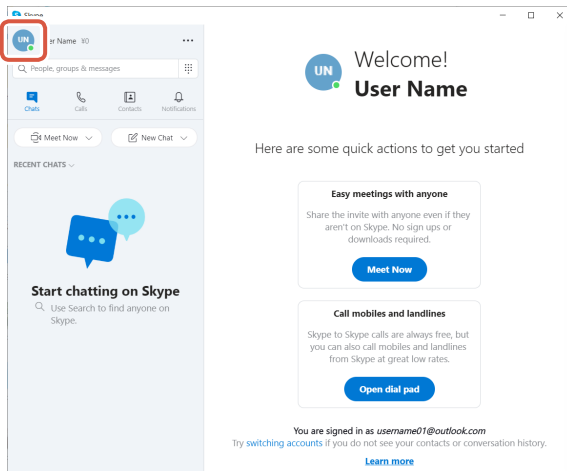

The set up instructions for a representative chat software is shown here as an example.

For other software, please refer to the manual for the software that you are using.

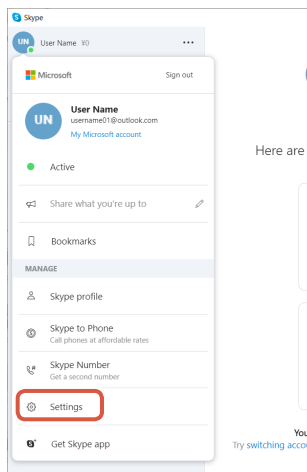

## Use with Skype™

The following images are the instructions for “Skype for Windows Desktop”. The displays for the Microsoft Store application and Mac version are different, but the steps are the same.

- 1 Check that the camera is connected to your PC before starting up Skype.
- 2 Click on “User profile”.

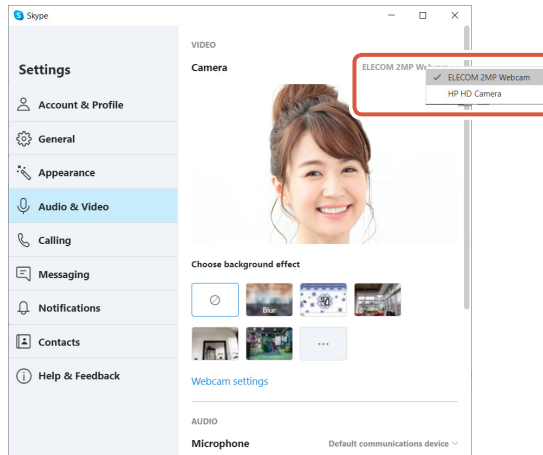

- 3 Click on “Settings”.

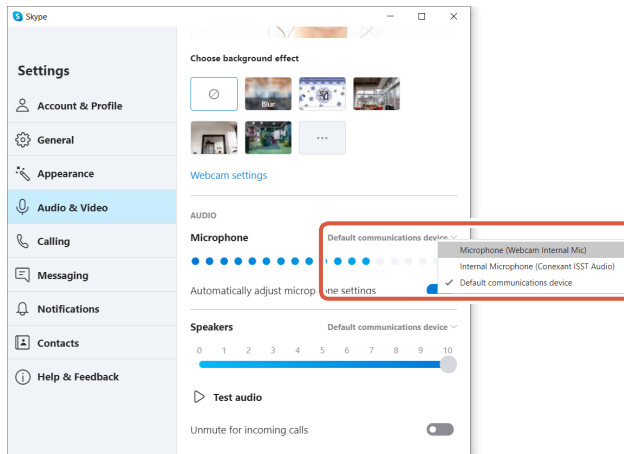

**4** Set up “Audio & Video” as below.

**5** If multiple cameras are connected, select “ELECOM 2MP Webcam” from “Camera” under “VIDEO”.

If you can see the image taken by the camera, this indicates that it is operating correctly.

**6** Select the audio device from “Microphone” under “AUDIO”.

Select the following if you are using the camera built-in microphone.

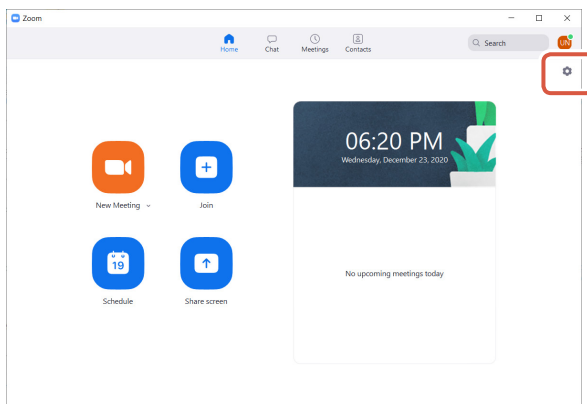

- Microphone (Webcam Internal Mic)

**You can now use this product with Skype.**

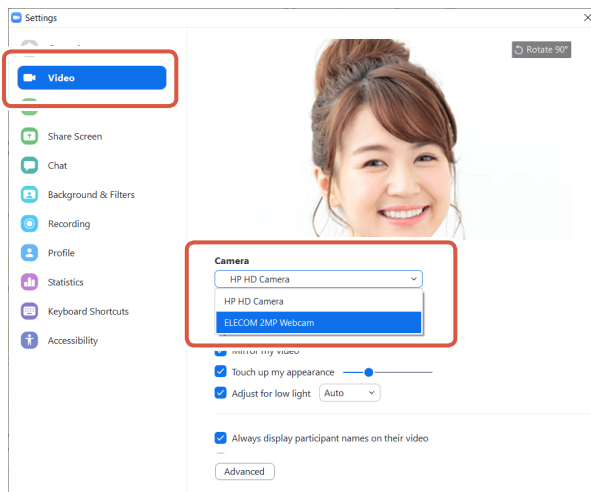

## Use with Zoom

The instructions below are for the Windows version. The display for the Mac version is different, but the steps are the same.

- 1** Check that the camera is connected to your PC before starting up Zoom.
- 2** Click on the  (Settings) icon.

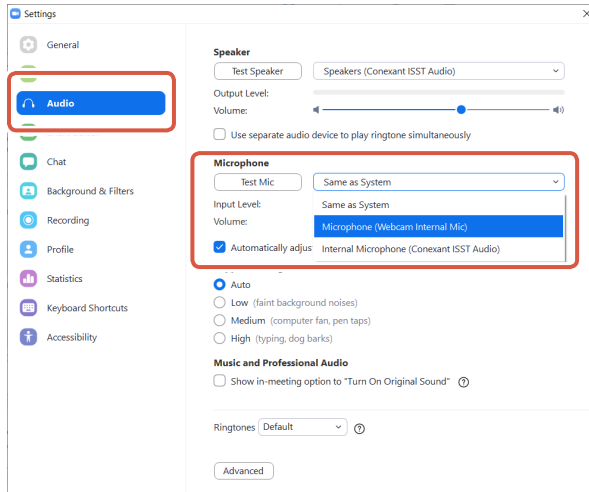

- 3** Select “Video”.
- 4** If multiple cameras are connected, select “ELECOM 2MP Webcam” from “Camera”.

If you can see the image taken by the camera, this indicates that it is operating correctly.

**5** Select “Audio”.

**6** Select the audio device from “Microphone”.

Select the following if you are using the camera built-in microphone.

- Microphone (Webcam Internal Mic)

**You can now use this product with Zoom.**
